**boxedUC**  
Unified Communications in a Box

## WHAT IS BOXEDUC?

boxedUC is an innovative

“appliance as a service”

which integrates with an

“all in one”

philosophy a **unique server** which manages as a service the whole application suite of **Microsoft Unified Communications**, allowing to access these latest technologies even with very **low investments**.

## HOW DOES IT WORK?

Through Microsoft **Hyper-V 2008 R2 virtualization** engine fabbricadigitale sets up an appliance which offers in a single hardware solution a complete platform which includes the following Microsoft products:

The **self-provisioning and administration** from the user point of view is guaranteed thanks to a custom version of **MultiUx**, the **management application** for Unified

Communications platforms that is entirely web based, which fabbricadigitale has developed and deplyed with dozens of installations worldwide. To make the solution even more complete it is available on demand also the integration with **Blackberry Enterprise Server 5.0** and a **Voice/Media Gateway** of latest generation, which allows the direct integration with PSTN (PRI, BRI) or the **VoIP telephony** (Trunk Sip, Skype, Asterisk) on demand.

**By virtue of the hardware collaboration with ** and thanks to the power “R” server family all those remarkable performances necessary for an Enterprise class platform such as **boxedUC** can be guaranteed.

## WHO NEEDS BOXEDUC?

**boxedUC** is designed to fit the necessities of **Small-Medium Business companies** or for **large organizations** which needs to provide UC to **branch offices**, for organizations working in a limited period of time or in temporary environments, for Proof Of Concepts in large companies that want to test UC services before adopting them.

Having undergone **deep stress-test** sessions in our development facilities **boxedUC** can guarantee excellent performance for up to 500 registered users and **up to 200 concurrencies** with all the features including **audio/video** communications running.

## STRENGTHS

### ***Quick & Optimized:***

the accurate optimization of the set up and the deep hardening of **boxedUC** it is possible to substitute of a whole set of servers with **boxedUC** that can be **deployed in few hours**, optimizing infrastructure investments and reducing dramatically start-up, configuration and tuning times.

### ***Remote system management:***

**boxedUC** is constantly up-to-date thanks to the “as a Service” model guaranteeing that the system is **monitored 24/365** and managed by a **specialized remote structure** as an extended part of the cloud. **A dedicated Service Desk** guarantees a quick support by a qualified staff.

### ***Local Self-Administration:***

the customer **administrates and provisions** his **boxedUC** resources, as mailboxes and OCS users, through **MultiUx**, a web-based middleware developed by fabbricadigitale for Microsoft UC servers.

### ***Security:***

Security has been a central aspect in the design of **boxedUC** integrating **remote services - monitoring, security patches distribution, etc. - and local protections - ForeFront, etc.**

### ***Service Level:***

The **quality** and **effectiveness** of the services provided by **boxedUC** are measured by **performance, availability, reliability, security** and **serviceability** indicators.

## WHERE CAN I FIND IT?

**boxedUC** is distributed in the world through qualified partners and certified distributors, and is monitored and maintained directly by fabbricadigitale 24/365.

## **ADD-ONS**

### ***boxedUC High Availability:***

**boxedUC** can be deployed in a real **High Availability environment** through the use of an additional appliance improving the reliability of the system.

### ***External backup:***

Permits the movement of **local backups** from **boxedUC** to an external Network Area Storage to improve the security of backup files in case of **boxedUC** hardware failure.

### ***Hybrid Voice Gateway integration:***

**boxedUC** could be deployed with the integration of Microsoft **Lync** certified Hybrid Voice Gateways to support voice and telephone features.
